Education

M.S in Computer Science, Aggregate CGPA : 4.0/4.0

UNIVERSITY OF FLORIDA

Aug. 2019 - Present

Courses: Analysis Of Algorithms, Mathematics for Intelligent Systems, Advanced Data Structures

B.E. in Computer Engineering, Aggregate CGPA : 8.19/10.0

THAKUR COLLEGE OF ENGINEERING AND TECHNOLOGY, MUMBAI

Aug. 2012 - 2016

Experience

Full Stack Engineer

PAYTM INSIDER

Mumbai, India

Sep. 2018 - Jul. 2019

- **Technologies** : Laravel, MySQL, Docker, Amazon Web Services, Kubernetes, Redis
- Worked as a Full Stack Engineer, to revamp existing accreditation system to improved its security, add features to existing system.
- Developed integration, UI and unit tests cases increasing code coverage from 0% to 48%.
- Updated existing code base from PHP5.6 to PHP7.2. Decreased multiple API response time from 2-10s to < 500ms. Converted various synchronous jobs to asynchronous for better throughput. Dockerized application to host it over AWS Elastic Kubernetes Service(EKS).

Full Stack Engineer

IDFY

Mumbai, India

Oct. 2017 - Sep. 2018

- **Technologies** : Ruby On Rails, Sinatra, Sidekiq, RabbitMQ, CoffeeScript, Haml, Docker, Google Cloud Platform, Kubernetes
- Complete ownership of application for tracking address verification task across various disciplines that helps our in-house operations team to create, update and manage leads.
- Expanded existing functionality and re-factored existing code to handle higher volumes and have better user experience. Assisted in moving application from Heroku to Google Cloud Platform
- Designed, developed and shipped TDD web application to maintain SMS and email communication for all in-house projects

Software Engineer

NEWGEN SOFTWARE TECHNOLOGIES LIMITED

Mumbai, India

Aug. 2016 - Aug. 2017

- **Technologies** : Cordova, Java, Android, jQuery UI, Bootstrap
- Worked on enterprise grade mobile capture application for IndusInd Bank Limited which resulted into reduced TAT for Account Opening process from 3-4 days to 10 mins. More than 1000+ digital accounts being sourced daily using tablet.

Projects

Grid Traversal Robots

E-YANTRA ROBOTICS COMPETITION, IIT BOMBAY

<https://github.com/meanmachin3/>

Nov. 2013 - Mar. 2015

- Developed order picking algorithm for small scale warehouse simulation
- Created mine localization algorithm to locate mines in grid using DFS and Dijkstra's Algorithm

SenPi: Low cost smart solution for classrooms

FINAL YEAR PROJECT, MUMBAI UNIVERSITY

Nov. 2015 - Mar. 2016

- Addressed the operational issue of laptop scheduling in classrooms for teaching with a raspberry pi based solution

Open Source Contribution

SELF INITIATED

<https://github.com/meanmachin3/>

- Free and open source app to share mental health experiences with loved ones: <https://www.if-me.org/>
- Website for PyCon India 2019 <https://in.pycon.org>
- Contributed to CircleCI orbs as a part of hacktoberfest '19 <https://github.com/CircleCI-Public>

Honors & Awards

2013	Semi-Finalist , VJTI's Annual National Robotics Competition
2014	First Prize , Blind C - Programming in C with the monitor kept off
2015	Sixth Prize , e-Yantra Robotics Competition
2016	Recipient , Innovation & Entrepreneurship Development Center Grant, Dept. Of Science & Tech
2016	Pat on the Back , Awarded for successful implementation of tab banking by Newgen

Leadership

2014	Event Manager , Student Body TCET-ISTE
2015	Technical Head , Sojourn
2015	Event Head , E-Nspire

Languages & Technologies

Javascript; Ruby; PHP; C; SQL; Docker; Laravel; Ruby on Rails; Java; C++; Git;
HTML; CSS JQuery; AWS; GCP;
